

We design your cards
to your wishes!

For further information you can
contact us at any time.
Our designers are looking forward
to cooperating with you!

-  Trim at least 3mm
-  Card dimensions 85,60 x 53,98 mm
-  Safety clearance 4mm

CHECKLIST

- CMYK color space**
Please make sure that your print data is created in CMYK colour space. Additional changes e.g. from RGB to CMYK can lead to significant colour differences. (ICC color profile: ISO Coated v2 300%)
- Safety clearance**
Distance of the text/information from the edge of the data format (prevents undesired cutting).
- File format**
We accept the following file formats: .pdf, .ai, .jpg, .eps.
Not suitable are print data from MS-Office programs such as Word, Excel or Powerpoint.
- Trimming**
Please make sure that the card dimensions of the print data are at least 1.5 mm larger than the actual card. This guarantees that the edge can be printed completely.
- DPI**
Please create all print files in a resolution of 300dpi. A subsequent increase of the resolution does not lead to a better print result.
- Visual**
Please create an additional view in which the positions of the front and back are clearly visible.

- Fonts**
Please convert all fonts into paths. Alternatively, you can also send us TrueType fonts.

Due to the high temperatures during the lamination process and the inherent colouring of the films, colour deviations may occur.
